IntelePeer Enhances Platform Security, Achieving SOC 2 Type 2 Certification

Continued certification affirms IntelePeer's commitment to policies, procedures and operations that meet SOC 2 Type 2 standards for security

San Mateo, CA, Dec. 7, 2022 – IntelePeer, a leading Communications Platform as a Service (CPaaS) and Communications Automation Platform provider, has achieved System and Organization Controls (SOC) 2 Type 2 certification in compliance with the standards established by the American Institute of Certified Public Accountants (AICPA) and the Chartered Institute of Management Accountants (CIMA). This certification affirms IntelePeer's commitment to policies, procedures and operations that meet SOC 2 standards for security.

"At IntelePeer, we're committed to making our platform as secure as possible and we're pleased to have obtained Type 2 certification in record time," says IntelePeer Chief Executive Officer Frank Fawzi. "Data privacy and security compliance have always been among our top priorities, particularly as more companies move to the cloud. Our customers can be confident that IntelePeer is invested in ensuring the highest security controls as reflected in our ongoing SOC certification."

SOC 2 compliance powers opportunity, trust and prosperity for businesses, people and economies worldwide. Recognized globally for its rigor, it involves an independent audit of a company's systems and organizational controls, with an assessment including a careful review of employee controls and training, IT and risk management mechanisms, product discipline and vendor selection. The certification informs a range of users regarding an organization's competencies relevant to the availability, security and integrity of the systems it uses to process end-users' data, its level of confidentiality and the privacy of the information.

IntelePeer's platform provides communications automation solutions that are rapidly customizable with advanced voice, messaging, and self-service technologies that create tailored customer engagements supported by AI and in-depth analytics. IntelePeer's robust network and intelligent solutions are built to meet the demanding regulatory requirements of most enterprises, including including CDPA, GDPR, HIPPA, and PCI-DSS.

About IntelePeer
IntelePeer helps customers communicate better, faster and smarter, through its omnichannel communications platform. Our low code, no code and co-creation options provide customers with simple, easy-to-use tools that can be utilized by anyone and are also accessible through developer APIs. Powering automation through AI and analytics, IntelePeer provides industry-leading time-to-value and rapid time to improved customer experiences with solutions that work seamlessly with existing business software and infrastructure.
